

Web Feedback 2

Purple – fix ASAP

Pink – please try to fix before portfolio day

Orange – it'd be nice if you have the time

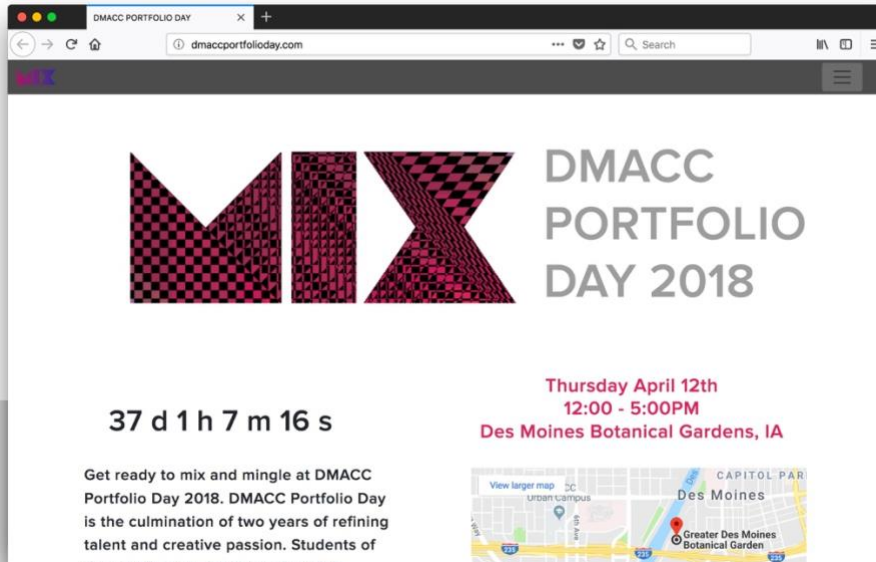

Navbar -

- When the Nav bar hits 2 lines, center them and shrink the line height a bit - maybe even have less space between the options

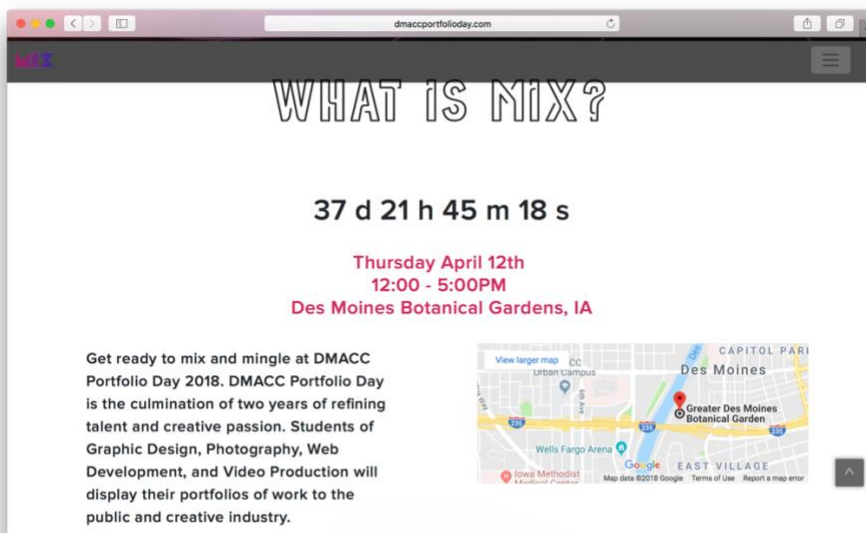

Home page-

- NO image or scan lines on the home page
 - make it white
- back up font to Proxima nova: Roboto google font (not all computers have Proxima as it didn't appear on some of the school computers on campus)

- since the homepage is very bland could you format it like so ^
 - basically, just move everything up and get rid of the “What is MIX?” title
 - probably the tab for it as well since it’s all kinda the same page this way
 - the phone layout would stay the same as it now but without the “What is MIX?” title
 - Sorry for the formatting change, if it doesn’t get done then I understand but if it could get done before the yellow stuff that’d be awesome

What is Mix?

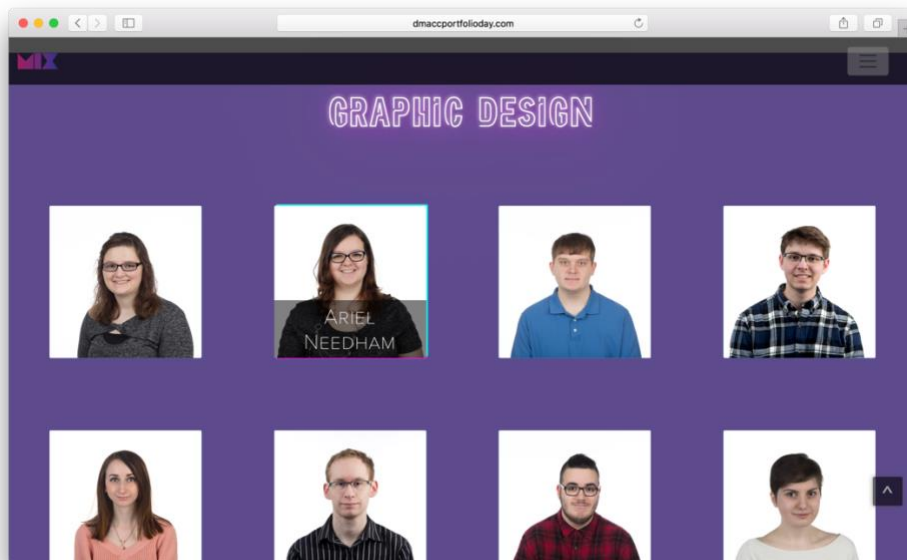

- pink text - keep it over by the map like before, we liked that just make sure it doesn’t get hidden behind the map when resized

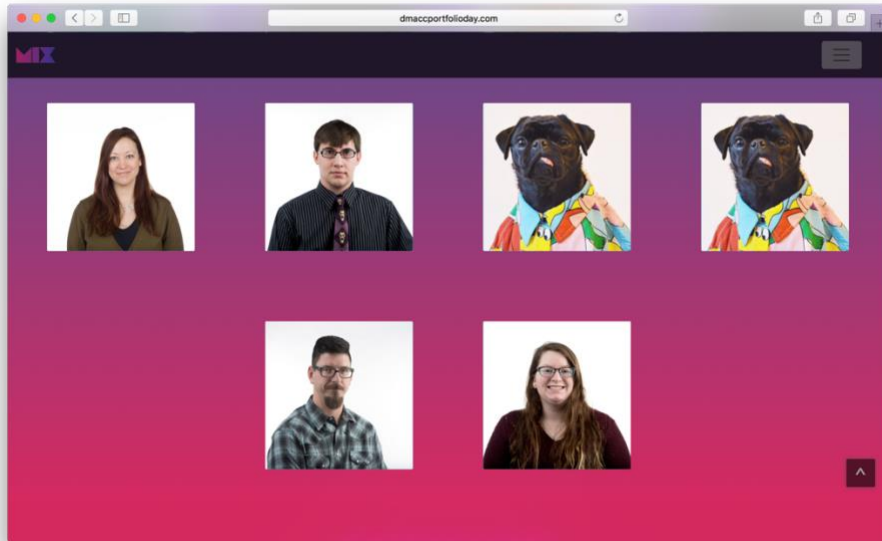

- we liked this page from before - please bring it back

Student Area:

- move video students down
 - photography - pink
 - web - yellow
 - video - orange (use the orange from the mix logo specs sheet - under the secondary colors)

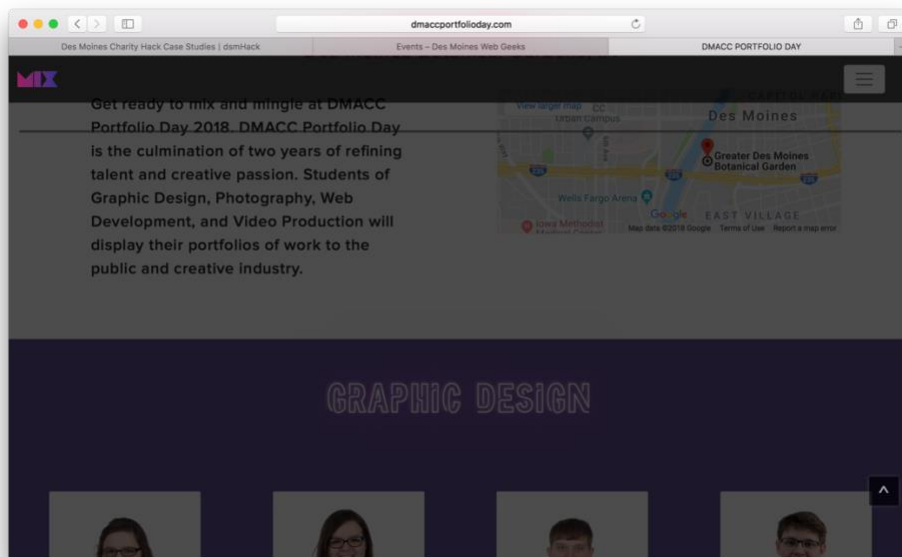

- NO flashing border
- the entire image area should be clickable - including the part with the name

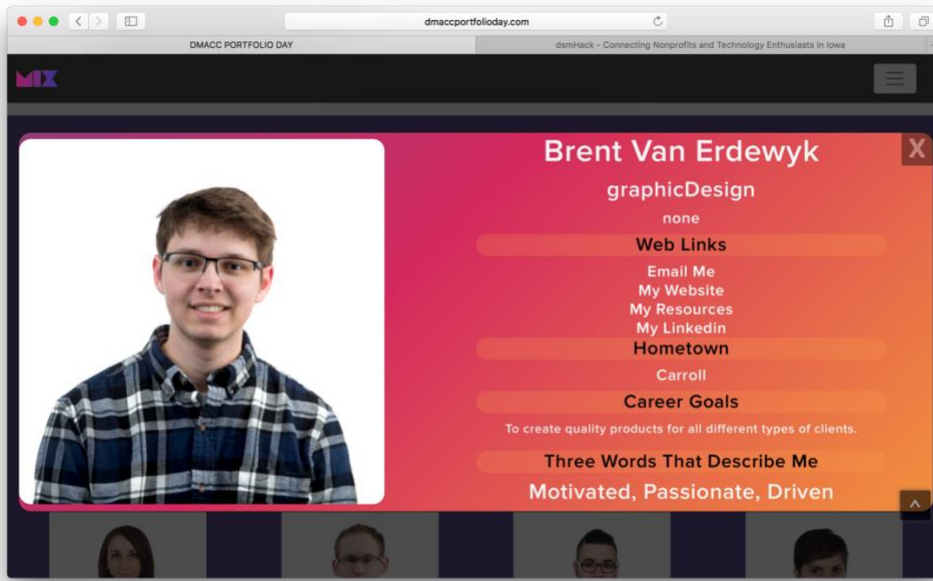

- is there a way to “zoom out” of the dog photo so it’s not as close up? (still want it the same image size but the dog is very large compared to the people)

Student Info-

- the animation and doesn't always show up

- can we make the background gradient the color of the main program -
 - design would be purple to pink
 - photography would be pink to yellow
 - web would be yellow to orange
 - video would be orange to yellow
- the photo: centered please, both vertically and horizontally.
- it needs to be “Graphic Design” not “graphicDesign”
- I assume the none is from the second degree, but it needs to go
- if there are two programs, format like so: “Graphic Design, Photography” - aka, same line, comma + space separating them
- we want the links to actually say what they are, not just “Email me”- I for one HATE when sites have the email me thing, I don’t use mail, I hate it I won’t use it, I’d rather copy paste the email from the site, but I can’t even see the email this way. same goes for the website link - I want the url not just a link. LinkedIn is fine the way it is though, leave that one alone
- what is “My Resources”? why is it there? don’t need it. delete it
- the “X” to close this window doesn’t work
 - also, don’t need the black background on the X, as long as it’s seeable it works, most everyone knows there’s almost always an x in the upper right corner of pop ups
- please refer back to previous layout for how we want the layout displayed on the student bio - I have it attached again for reference, please ask if you don’t understand or need help with part of it (The text should be white though)

HOMETOWN

Des Moines, IA

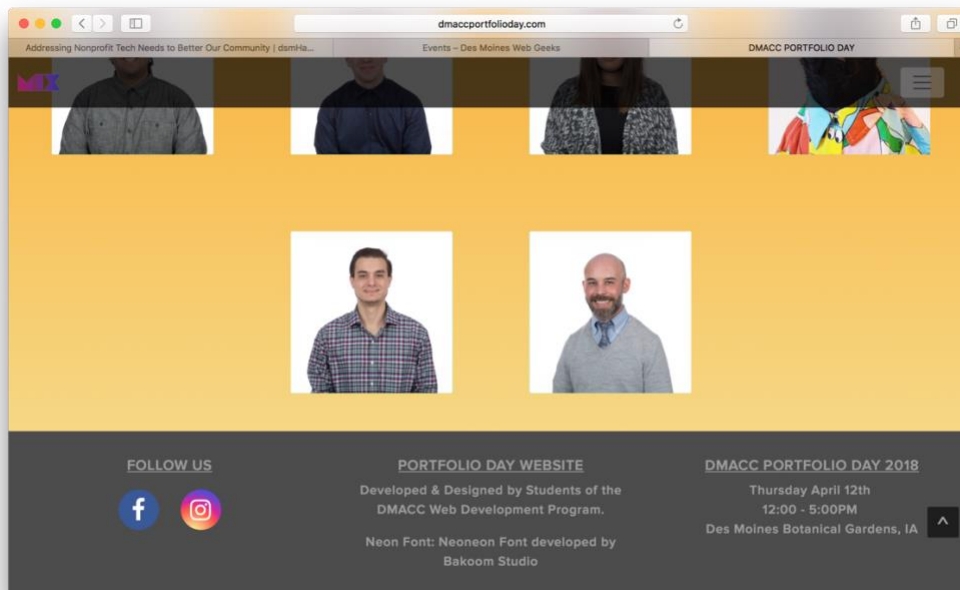

CAREER GOALS

Making money and being awesome

THREE WORDS THAT DESCRIBE ME

Smart, Really Smart, Uber Smart

Footer-

- social media icons - when rolled over, they do like a bounce or something that causes a lag between the original to the one with a white outline/black symbol - can we get rid of that bounce/lag in there
- why is everything in bold? use regular; titles of the area can be bold, but the underline is not needed
- “Des Moines Botanical Gardens, IA” can be split between 2 lines for more uniformity with centered text: split like so-
 - “Botanical Gardens
 - Des Moines, IA”
